Key Block (1/5 actual size)

The image shows a technical drawing of a right-angled triangle. The right angle is at the top-left corner. The vertical side is on the left, and the horizontal side is at the bottom. The hypotenuse connects the top-right and bottom-right corners. A dashed line is drawn parallel to the hypotenuse, positioned slightly to the right and below it. The letter 'c' is located in the lower-left area of the drawing.

c

The diagram consists of a rectangular frame with a diagonal line running from the bottom-left corner towards the top-right corner. A second, slightly thicker diagonal line is drawn parallel to the first one, positioned closer to the top-right corner. The letter 'B' is centered within the triangular area formed by the diagonal lines and the bottom-left corner of the frame.

B
